WALID RACHIDI & XAVIER GIDROL

CEA, Grenoble, France

BIO THERAPY AND BIOPRODUCTION OF INNOVATIVE
THERAPIES" (BBTI) & SKIN BIO-ENGINEERING FRANCE
PROJECT

PEPR EXPLORATOIRE MEDOOC & VASCULARIZED
ORGANOIDS - ON - CHIP

25.JUNE 2024 – 11 AM – LECTURE HALL

During this conference two PEPR (Priority Research Programs and Equipment) programs will be presented. Both programs have been selected for financial support in the context of the national initiative of the government "France 2030".

Walid Rachidi will talk about the BBTI program which focuses on "Biotherapy and Bioproduction of Innovative Therapies" (BBTI) & the project "Skin Bio-engineering France" which aims to develop next-generation skin substitutes for cutaneous regeneration.

Xavier Gidrol will present the MedOOC program based on the innovative field of personalized medicine via organs and organoids on a chip.

Illustrations of different scientific projects, which are part of these programs, will be provided.
